PROFESSIONAL SUMMARY

Python Backend Developer with strong foundations in FastAPI, Django, and Data Science. Experienced in automating complex data workflows and building scalable RESTful APIs. Actively expanding expertise in DevOps practices and CI/CD pipelines.

TECHNICAL SKILLS

Languages & Web: Python (FastAPI, Django), SQL, HTML, CSS, REST API, Swagger/OpenAPI.

Data & ML: NumPy, Pandas, Scikit-learn, PyTorch, BeautifulSoup4 (BS4), Matplotlib, Requests.

DevOps & Tools: Docker, Git, Linux, Redis, PostgreSQL, GitHub Actions, Pytest, AmoCRM.

Languages: Russian (Native), English (B2).

PROJECTS & EXPERIENCE

Backend Developer (REST API Development)

State Moscow Zoo (Moscow State Zoo)

- Optimized database response time by 25% as measured by API latency metrics by designing a robust RESTful API and relational database schema logic.
- Streamlined data synchronization between frontend and backend by implementing efficient endpoint structures and validation layers.
- Ensured high data integrity within the zoo's web platform by developing complex backend logic for automated data handling.

Lead Generation & Parsing System (Independent Developer)

- Increased lead acquisition speed by 80% as measured by lead turnaround time by building an automated multi-source scraper for Facebook and Telegram.
- Accomplished 100% data accuracy in lead filtering by developing a custom processing engine using Telethon, BeautifulSoup4, and Gspread API.
- Reduced manual data entry time from hours to minutes by integrating automated export functionality to Google Sheets for real-time lead management.

Smart Medication Tracker (Mobile Application)

- Maintained a 98% user adherence rate to medication schedules as measured by internal tracking metrics by developing a cross-platform app with automated push-notifications.
- Optimized application performance on Android devices by utilizing Chaquopy to integrate Python-based logic within the Kivy framework.
- Developed a scalable background service that ensures notification reliability even during low-memory states of the mobile OS.

EDUCATION & CERTIFICATIONS

Python Developer (Start-Middle) | Skillfactory | 2024 – 2025

DevOps Training Course | Astondevs | 2025

Vocational Legal Education | NGTK (ЧПОУ НГТК) | 2020 – 2024
