SUMMARY

Python Backend Developer with strong foundations in FastAPI, Django, and Data Science. Experienced in automating data workflows and building scalable RESTful APIs. Actively deepening my skills in DevOps practices and CI/CD pipelines.

Languages: Russian (Native), English (B2)

TECHNICAL SKILLS

Languages & Web: Python (FastAPI, Django, SQLAlchemy), SQL, HTML, CSS, REST API, Swagger/OpenAPI, Celery.

Data & ML: NumPy, Pandas, Scikit-learn, PyTorch, TensorFlow, BeautifulSoup4 (BS4), Matplotlib, Requests.

DevOps & Tools: Docker, Git, Linux (Ubuntu), Nginx, Redis, PostgreSQL, GitHub Actions, Pytest, Postman, Unity.

EXPERIENCE

Backend & API Developer

Nov 2021 — Apr 2026

Algoritmika

- Developed and implemented a scalable backend architecture and RESTful APIs, improving internal service availability by 30%.
- Designed and optimized relational databases, reducing query processing time by 40% through effective indexing and normalization.
- Ensured seamless system operation and backend logic support, reducing critical failures under high-load conditions.

PROJECTS

Backend Developer (REST API Development)

Group Project

Moscow State Zoo

- Optimized database response time by 25% by designing a robust RESTful API and relational database schema logic.
- Streamlined data synchronization between frontend and backend by implementing efficient endpoint structures.
- Ensured high data integrity by developing complex backend logic for automated data handling.

Lead Generation & Parsing System

Personal Project

- Increased lead acquisition speed by 80% by building an automated multi-source scraper for Facebook and Telegram.
- Accomplished 100% data accuracy in lead filtering using Telethon, BeautifulSoup4, and Gspread API.
- Reduced manual data entry time by integrating automated export functionality to Google Sheets.

Smart Medication Tracker (Mobile Application)

Personal Project

- Maintained a 98% user adherence rate through an app with automated push-notifications.
- Optimized performance on Android using Chaquopy to integrate Python logic within the Kivy framework.

EDUCATION

MIREA — Russian Technological University

Software Engineer (Unfinished Higher Education)

CERTIFICATIONS

Python Developer (Start-Middle) | Skillfactory | 2024-2025

DevOps Training Course | Astondevs | 2025
